Overview:

Current FBO assemblies include the 3-piece drain valve assembly shown below.

Effective immediately, Racor is changing the drain to a 1-piece design that includes a lock to prevent users from bumping the valve and causing a spill.

This new valve is easy to install, has fewer parts, and provides the peace-of-mind you come to expect from owning a Racor filter.

Replaces Part Numbers: 71943-.25, 72812 and 72709.
