R125 Series
High Capacity Spin-On Filter

Racor spin-on fuel filter/water separators are well known for high quality performance and engine protection.

If you currently use a Racor 360, 400, 600, or 700 series filter/water separator, you can now upgrade to the R125 replacement element without the need to purchase a new bowl.

The R125 is a great fit for heavy-duty and biodiesel applications. More Aquabloc®II media in the R125 provides up to 3X the life and improved water removal when compared to standard filter elements.

Features and Benefits
• Compatible with Racor 345/60/90, 400, and 700 Series heads and bowls
• Great for heavy-duty and biodiesel applications
• Flow 45 to 90 GPH (170 to 341 LPH) in upgraded applications
• High contaminant capacity
• Improved water removal
• Easy upgrade with existing Racor parts
• Available with 2, 10, or 30 micron Aquabloc®II media
• Optimum engine protection

ENGINEERING YOUR SUCCESS.
The R125 Series is a direct replacement for the 345/60/90, 400, 600, and 700 Series Racor fuel filters. Both the threads for the fuel filter head and for the collection bowl are compatible with the R125 series. If an engine is running a R45, R60, or R90 filter, it can now be upgraded to a R125 Series without the need to purchase a new bowl. Now it is easier than ever to get more capacity and flow without buying extra parts.

The R125P (30 micron) is a great fit for biodiesel applications as it is a larger filter with more capacity. A larger filter adds more filtration media surface area, which lowers the flow velocity going through each square inch of the media. This extends filter life and increases water removal efficiency. All filter materials and seals are compatible with ultra-low sulfur diesel (ULSD) fuel and B2 Biodiesel.

The R125 Series is available for order with 2 (R125S), 10 (R125T), or 30 (R125P) micron proven Aquabloc®II media.

Benefits include optimum engine protection with Aquabloc®II media, high contaminant capacity, flows up to 120 GPH/454 LPH (90 GPH/341 LPH as an upgrade), and easy changeout with existing Racor parts.

The R125 Series can be used with the following Racor filters:

300 Series 400 Series 600 Series 700 Series
